

### Laboratory Technician

Based in the outdoor recreation hub of Squamish, BC, this is an entry level role for a Chemist or Chemical Technologist. Reporting to the Manager, Field Operations and working within the operations team, you will be executing sampling and analysis activities related to the pilot plant operations. Specifically, you will assist with the setup and execution of prototype campaigns and maintain laboratory equipment. This role includes significant work outdoors in an industrial setting, lab work, and some desk work.

This is an opportunity to join a team focused on integrating atmospheric CO<sub>2</sub> into synthetic liquid fuels production and a great match for an individual who wants to be part of an innovative culture where your contributions are noticed.

### Qualifications

Education: Technical College graduate or University degree in chemistry or related disciplines

Experience: 1 to 3 years of laboratory work

- Exposure to lab work at an industrial scale is an asset.
- Good working knowledge of qualitative/quantitative chemical analysis procedures.
- Organized and exceptional report writing skills.
- Working knowledge of related safety and WHMIS regulations.
- Strong analytical, troubleshooting and problem-solving skills.

In addition to technical skills, you also need to have these to be the right fit:

- Takes pride in work and work environment.
- Exceptional organizational and planning skills.
- Excellent communication skills.
- Experience and comfort in working in an R&D environment.
- Ability to work effectively within a multi-disciplinary team.
- Thrive on doing things that have not been done before (explorer mindset).
