

## Pilot Plant Operator

Based in the outdoor recreation hub of Squamish, BC, this is an intermediate level role for a technologist or technician who understands plant operations and laboratory analytics. Experience in process or water treatment plant operations would be ideal. Reporting to the Site Manager, you will be operating and improving the pilot plant equipment, running major test campaigns, tracking pilot activities across shift changes and assisting with effective dissemination of information between the groups.

This is an opportunity to join a team focused on integrating atmospheric CO<sub>2</sub> into liquid fuels production and a great match for a hands-on, curious individual who wants to be part of a start-up culture where your contributions are noticed.

### Qualifications:

Education: completion of a chemical engineering technology or power and process engineering technology diploma.

Experience: minimum 3 years of technical work in a plant or testing facility.

- Lab experience as it relates to process control.
- Hands-on experience with equipment maintenance and repair.
- Familiarity with motorized equipment such as forklift, telescopic man lifts, scissor lifts is beneficial.
- Strong analytical and problem-solving skills.

In addition to technical skills, the right fit will:

- Have a need to know how things work, how they are built, how they come apart and how to re-build them.
- Be a self-starter with the ability to work independently towards multiple deadlines with minimum supervision in a fast-paced environment.
- Function well in a job where priorities change from operations to testing to troubleshooting and maintenance.
- Have experience and comfort working in an R&D environment.
- Thrive on doing things that have not been done before (explorer mindset).
- Have either landed immigrant status or Canadian Citizenship.
