

Pilot Plant Operator

At Carbon Engineering (CE), our vision is to lead the world in the large-scale removal of carbon dioxide from the air and advance our shift to a sustainable carbon-neutral society. Based in the outdoor recreation hub of Squamish, BC, this role will be a great fit for a technically apt, curious and hands-on individual who feels passionately about this vision and wants to be a part of a fast-paced culture.

Position Scope

This is a technical role for a Chemical or Mechanical Engineer, Technician or Operator who understands industrial processes, operations, equipment and laboratory analytics. The ideal candidate will have experience developing, refining and optimizing chemical process plants.

Responsibilities

- Operate and improve the pilot plant equipment.
- Run unique or assigned test campaigns.
- Track pilot activities across shift changes.
- Assist with the dissemination of information between Operations, Engineering, and the Advanced Development teams.

Experience

- Education: Degree or technical diploma in Chemical or Mechanical Engineering or Chemistry. Candidates not meeting these requirements that have applicable plant operations experience will be considered.
- Experience: Minimum of 3 years of technical work in a plant or testing facility.
- Mechanically inclined and hands-on experience with equipment maintenance and repair.
- Familiarity with operating motorized equipment such as forklift, telescopic man lifts, scissor lifts is beneficial.
- Strong analytical and problem-solving skills.
- Lab experience as it relates to process control is a bonus.

In addition to technical skills, the right fit will:

- Have operations experience in water treatment, mining, or oil and gas (ideally gas to liquid).
- Be a self-starter with the ability to work independently or as part of a team, to meet multiple deadlines with limited supervision in a fast-paced environment.
- Function well in a job where priorities change from operations to testing to troubleshooting and maintenance. Able to take a project from concept through design
- Have strong written and verbal communication skills and experience in technical report writing.
- Have experience and comfort working in an R&D environment.
- Thrive on doing things that have not been done before (explorer mindset).
- Be legally able to work in Canada.
